

ITECH COMPUTER FORENSICS

ITECH Computer Forensics service can be used to recover information or deleted files from any media source. The ITECH Computer Forensics team is a group of professionals that can deliver the information you are looking for whether it is required for a legal case, company audit, or investigation. We can appear in court or supply written testimony as an expert witness or specialist for any of the forensics services we perform.

Listed below are some of the common items our forensics team can uncover

- ✓ Internet History
- ✓ File Access History
(Recent Documents)
- ✓ Email History
- ✓ Email Searches
(including web-based email)
- ✓ Document Search
- ✓ Deleted Items Recovery
- ✓ Text Searches
- ✓ Password Retrieval
- ✓ Recovery of data from cell phones and PDAs
- ✓ Recovery of any media source
- ✓ Determination of event timelines, when possible

Important items to consider which will ensure the best results

- ✓ Maintain a copy of the data with the original state of hard drive
- ✓ If deleted items need to be recovered, leave the computer turned off until submitting to ITECH Solutions.
- ✓ If email searches or email history are needed - time is of the essence. The following items are time sensitive.
 - o Password Changes – If the user of the email account changes their password we may lose access to the account.
 - o Email server history – Most email servers only keep a history for 30 days.
